

Ordering Business Cards

Business cards are one of the most commonly used marketing pieces out there, and they are ultimately your first impression and reminder you leave with any potential prospect. They serve as tangible, physical representation of your business and brand.

Here are some tips for when ordering business cards.

- Have your card reflect your business in some intuitive and engaging way.
- Make it clean and unique.
- Make it shareable.
- The whole point of your business card is to share with others!
- You'll want to make sure your card is scanner friendly. Here are some other options to consider:
 - Don't place text over images
 - If included, keep images simple
 - Avoid shading, italics or underlining
 - Use a clear, readable font such as Times New Roman or Helvetica
 - Make sure there's enough space between different lines on the card so they remain legible.
